Projects

Portfolio Website

React, Next.js, SASS, Redux, Figma

portfolio-babyccino.vercel.app
github.com/babyccino/portfolio

- Created website from scratch using no CSS libraries, taking inspiration from other portfolio sites while personalizing design
- Leveraged Next.js features such as lazy loading and increased performance by using CSS over JS whenever possible
- Used Figma to create component designs

LetterBoxr

React.js, SASS, Redux, Figma

letterboxr.vercel.app
github.com/babyccino/Letterboxr

- Designed a responsive web-app that letterboxes images to fit Instagram's specific aspect ratios
- Component unit testing done using Jest

QBO donation receipt generator

Node.js, Google API, Nodemailer, PDFKit

github.com/babyccino/donation-receipts

- An open-source, command-line tool for non-profits, for generating yearly donation receipts from QuickBooks Online data
- Takes CSV data from QBO and uses either Google's Gmail API to create drafts and or Nodemailer to send receipts directly to donors
- Asynchronous operation using async/await and promises

Education

Bachelor of Science

The University of Western Australia

2013 – 2017

Majors: Physics, Maths

Recent Work Experience

Bookkeeper/Administrator

SUC

2021 – Present

- Handled bookkeeping and administration tasks such as financials, payroll, room bookings, and business development
- Ensured 100% processing rate of donations using self-developed receipt generator
- Prevented loss of approximately \$2000 by discovering organisation's overpaid bills
- Managed digitization transition process of paper timesheets
